

# Maths Lessons

Maths lessons at North Baddesley Junior School are engaging, well-structured and make clear links between prior and new learning.

## Key aspects of a Maths lesson

- Makes clear and explicit connections between mathematical facts – children are aware of what they are learning and the links between prior and current learning.
- Explicit teaching of strategies to solve problems. Problems to be used entwined within lessons.
- Includes manipulatives and representations that are clearly accessible to all. Learning walls to reflect the strategies being taught.
- Develops independence and motivation – all children should be able to access task independently, task design will need to facilitate this.
- Tasks and resources to challenge and support
- Use assessment to build upon prior knowledge
